

One step ahead

Global Project Tracker

Focus on the most worthwhile opportunities with complete visibility of upcoming projects

- Where are the upcoming opportunities in the pre-FID phase?
- What is the demand forecast under different oil prices?
- Which opportunities are viable based on underlying field economics and FID status?
- What is the complete construction cycle for key projects?

In an increasingly competitive environment, visibility of upcoming projects is essential for Oilfield Services (OFS) companies to focus on the most viable prospects.

To prioritise tendering activity and increase business development exposure, you need to identify and screen opportunities in the pre-FID phase, and the projects' associated service requirements.

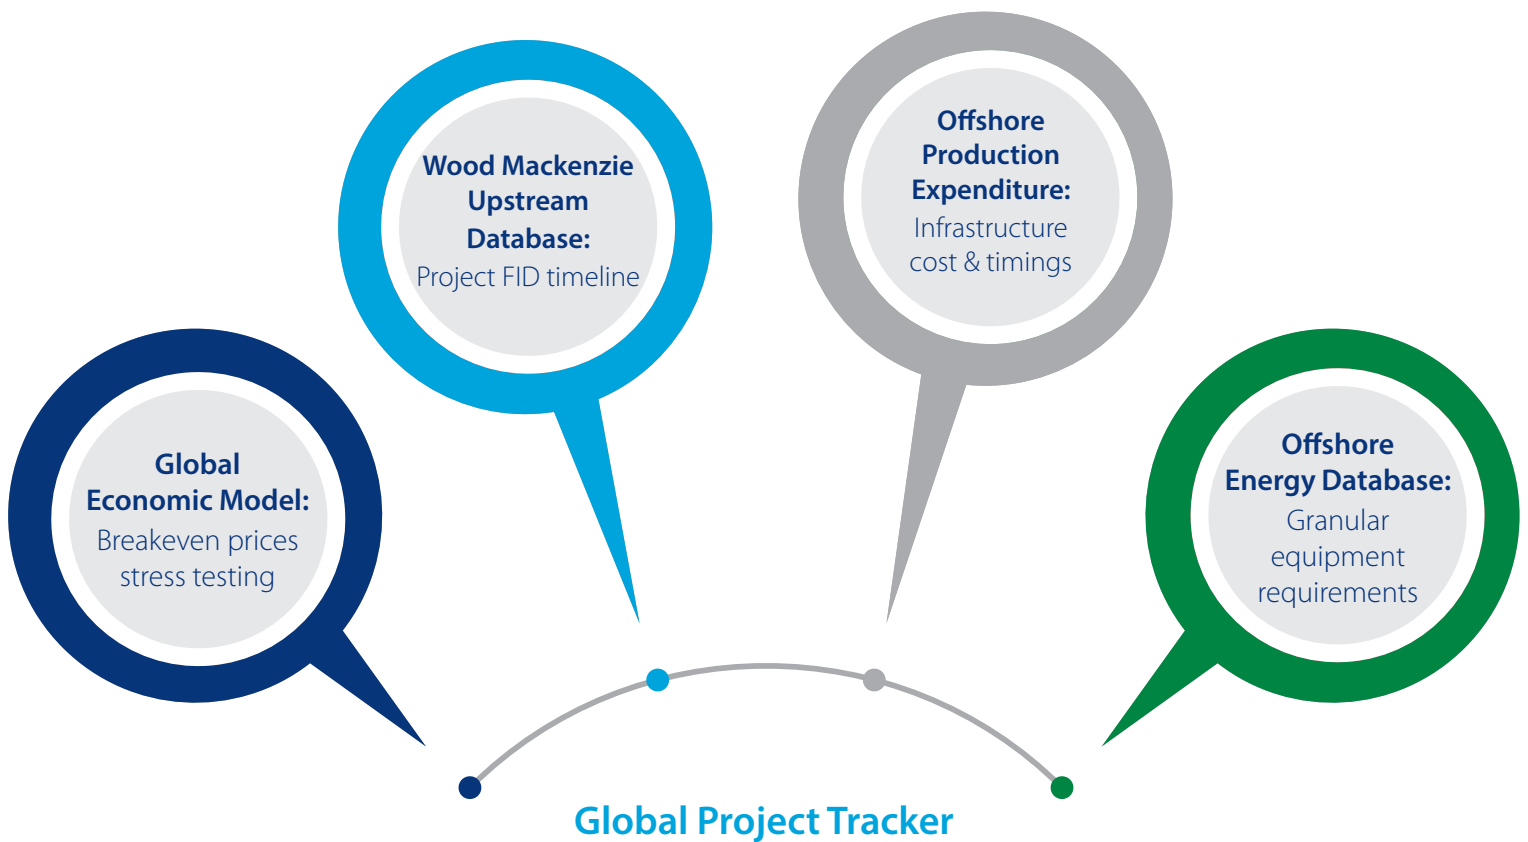

The Global Project Tracker (GPT) is an online pre-FID greenfield equipment and services quantification tool. It combines the output of Wood Mackenzie's Global Economic Model (GEM) and upstream database with Infield's proprietary infrastructure database to deliver a unique opportunity identification solution that feeds field economic scenarios down to the infrastructure level.

Identify opportunities and stress test to find the right prospect for you

Contact us now to find out how the Global Project Tracker can help you forecast equipment demand:

- **Run different breakeven, discount rate and development cost deflation scenarios** across the offshore facilities, SURF, SPS and conventional sectors.
- **Segment and quantify the market**, down to the kit and capex detail level and manipulate by differing cost categories, geography, operator, equipment and material type.
- **Quantify your core/addressable market** under differing scenarios, setting this market in context to the wider offshore industry and identify opportunities for your sales function to pursue.

- Benchmark the viability of opportunities based on their underlying field economics
- Filter opportunities by their FID status or their expected FID year
- Understand a projects construction cycle from pre-FID through to installation
- Filter data by package category, right down to the individual component for each package

Wood Mackenzie™, a Verisk Analytics business, is a trusted source of commercial intelligence for the world's natural resources sector. We empower clients to make better strategic decisions, providing objective analysis and advice on assets, companies and markets. For more information visit: www.woodmac.com

WOOD MACKENZIE is a trade mark of Wood Mackenzie Limited and is the subject of trade mark registrations and/or applications in the European Community, the USA and other countries around the world.
