

The Top 5 Reasons Investment Banks Choose Wood Mackenzie to Power Their **Metals Advisory**

Wood
Mackenzie

Embrace the energy transition with a trusted partner

As the energy transition accelerates, the metals and mining industry is set to play an increasingly large role as a critical enabler. From the lithium in EV batteries to the rare earths in wind turbine generators, **mined commodities are integral building blocks of low-carbon technologies.**

Globally, more than **120 banks have joined the Net-Zero Banking Alliance** - currently representing over 40% of global banking assets - committing to aligning their lending and investment portfolios with net-zero emissions by 2050.

To successfully navigate the energy transition landscape, it's important to partner with a trusted provider of mined commodities market intelligence. **At Wood Mackenzie, we guide companies investing in a sustainable future** in the way we power our planet.
