

WoodMac Direct Delivery Solutions

Our data. Your way.

The volume of data in the energy and natural resources sectors is growing at an exponential pace, creating challenges for organisations to manage information efficiently.

Big Data and Analytics are now integral parts of how we all operate. Leading companies are adopting cloud-based solutions for enhanced analytics and automation to help improve performance, drive innovation and achieve the greatest results.

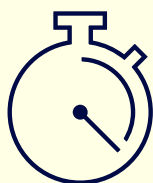

Wood Mackenzie now offers cloud-based delivery solutions that give you instant access to the data you need, where you need it. Flexible delivery options allow you to gain powerful insights and make better decisions at the right time.

Advanced data integration

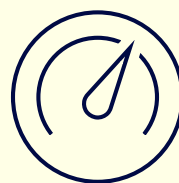

Get updates to your subscriptions via automatic downloads of Wood Mackenzie data. We are introducing two new delivery options that seamlessly integrate into your existing workflows:

WoodMac Direct Download: Import Wood Mackenzie data directly into your own databases, tools and applications. Download data manually or automate it as part of your business process.

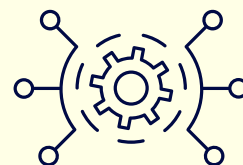

WoodMac Direct API: Complementing the Direct Download delivery option, the fully hosted API service provides a real-time connection with live updates of your Wood Mackenzie data subscription.

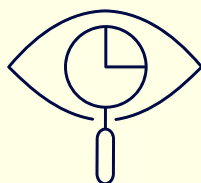

**Save time and
reduce manual
effort**

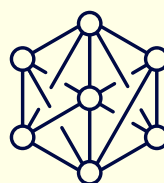

**Accelerate internal
processes through
automation**

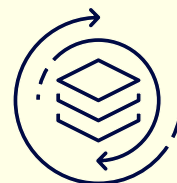

**Power your own
models and tools
with industry-
leading data**

**Uncover insights to
make data-driven
decisions**

**Share data across
internal user groups**

**Integrate with your
own proprietary
views**

Quickly gain insights with flexible delivery options

Whether you're an oil and gas company wanting to use analytics to improve exploration and drilling performance, or a financial player looking to screen assets for the best commercial opportunities, access to the right data at the right time is central to achieving your goals.

Wood Mackenzie can provide you with the most reliable and trusted data whenever and wherever you need it. Choose the delivery mechanism that best meets your specific needs so that you can get on with business and make the best decisions.
