

Product Overview

ARA Ethanol and Methanol Storage Report

- Delivered via email every Wednesday at 10:00 CET (4:00 am ET)
- Includes location, terminal, and tank-level data that can be accessed directly via Woodmac's API
- Tracks construction, maintenance, operational status, and product changes of every tank
- Includes regular intelligence reports related to tank status changes and key market events
- Complements Woodmac's existing coverage of ARA crude, gasoil, gasoline, naphtha, and jet fuel stocks

Coverage:

- Over 100 ethanol and methanol tanks in Amsterdam, Antwerp, and Rotterdam
- Total monitored capacity of over 625,000 MT (232,000 MT of ethanol and 396,000 MT of methanol as of Sept. 2019)

Weekly measurements of 122 ethanol and methanol tanks in ARA storage facilities

Woodmac's ARA Ethanol and Methanol Storage report delivers accurate and reliable inventory information at refinery and storage terminals in Amsterdam, Rotterdam, and Antwerp. As fuel additives or components used to make fuel additives, the data in this report complements other storage reports in the region, particularly Woodmac's ARA Gasoline & Naphtha Storage report.

Subscribers to the ARA Ethanol and Methanol Storage report receive tank-by-tank data for over 100 tanks at 13 facilities. The report is released at 10:00 (Central European time) on Wednesdays (4:00 am U.S. ET).

Thermal image

Image in the visual spectrum

Woodmac's aerial imagery – in the infrared and visual spectrums – allows our analysts to determine storage levels in fixed and floating-roof tanks.

Designed for you

Traders

Using our tank-level data, make more strategic market decisions based on inventory changes across the region.

Analysts

Generate and maintain supply and demand balances by using storage inventory data to track regional changes.

Risk Managers

Mitigate risk by understanding potential supply and demand imbalances via ethanol and methanol inventory data. Weekly data provides insight for price hedging and spot market activity.
