

## Product Overview

# Fractionator Monitoring Service

Gain critical insight and transparency into the operational status of the fractionators at Mont Belvieu with real-time data and alerts

## Features

- 68% of fractionation by capacity at Mont Belvieu
- Real-time alerts of operational upsets at fractionators based on observations of individual units with visual and infrared cameras. Email alerts include a link to the associated photo
- Database of all operational alerts published by Genscape for the fractionators it monitors
- At-a-glance overview of the operational status of individual units at the fractionators monitored by Genscape
- Visual history of each fractionation unit going back 4 hours from the most recent image associated with that unit
- Historical operating information for each unit
- Upcoming coverage expansions outside of Mont Belvieu (i.e. Conway, Kansas and Marcellus/Utica)

## Benefits

- Gain a competitive trading advantage in the NGLs and purity products markets with real-time operational status updates
- Access additional market intelligence as new fractionators are added to the services

The Fractionator Monitoring Service provides NGLs traders, analysts, and other market participants with updates on the operational status of the fractionators at Mont Belvieu. These units, which separate NGLs mix into its purity grade components, lie at the heart of the gas liquids system in the U.S. Gulf Coast. Any disruption to the operations of these units ripples through the entire petrochemical feedstock complex and can affect the price of NGL and related products.

Woodmac's aerial cameras identify operational disruptions at fractionators in real-time

Wood Mackenzie™, is a trusted intelligence provider, empowering decision-makers with unique insight on the world's natural resources. We are a leading research and consultancy business for the global energy, power and renewables, subsurface, chemicals, and metals and mining industries.
