

## Product Overview

# NGL Infrastructure Intelligence

Anticipate in-service dates for new & expanded facilities with the industry's most complete infrastructure NGL data

With the industry's most complete infrastructure NGL data, access on-demand, up-to-date data on expanded and upcoming projects with detailed information on facility type, owner, capacity, location and status.

## Features

- 2,500+ MB/d of upcoming NGL pipeline expansions
- 1,600+ existing, new, and expanded gas plants (over 180 Bcf/d in total capacity tracked)
- 120+ existing, new, and expanded fractionators (over 7 MMB/d in total capacity tracked)
- 90+ existing, new, and expanded ethylene crackers
- 30+ existing, new, and expanded PDH plants across both North America and China

Woodmac's NGL infrastructure intelligence data feed includes project tracking for gas processing plants, NGL pipeline projects, fractionators, PDH plants, ethylene crackers, and LPG export facilities.

## Benefits

- Gain access to a team of analysts that support the best-in-class Infrastructure Intelligence Service
- Save time and resources conducting in-house or outsourced research
- Consolidate contracts across vendors

Woodmac's Infrastructure Intelligence NGL data covers over 1,500 existing, new and expanded gas plants and over 120 fractionators.

## Designed for you

### Producer/Midstream/ End Users

Whether you're currently invested in an infrastructure project or looking to get your NGLs to market, access to detailed in-depth infrastructure intelligence can help you understand how best to position your assets. We provide the most up-to-date information – including start dates, capacities, location and ownership – on key infrastructure projects impacting the supply chain.

### Traders

Rely on our data to strategically adjust your trading position. Our methodology is unbiased, and while we offer our views on infrastructure status, we equip you with the information needed to form your own opinions.

### Analysts

Get a trusted, neutral view on infrastructure projects and timing. You'll find a trustworthy source of data to complement your models and better understand how products move from one region to another.
