

## Product Overview

# NGLs Monthly Supply and Demand

## Features

- Monthly PDF plus an XLS data table, delivered via email
- Regional detail for petrochemical consumption, seasonal demand, inter-regional movements, and exports based on current market incentives and contractual limitations
- Over 10 years of history and a 5-year forecast of balances and variables provided
- Quarterly file highlighting key comments from company transcripts, presentations, and press releases

## Benefits

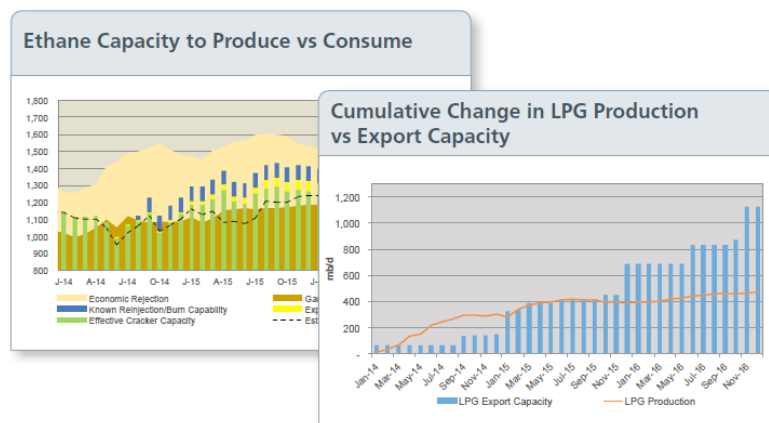

- Enhance decision-making for capital investment and trading when you understand the drivers of future NGL supply and demand on a regional basis
- Confirm, augment, or challenge in-house forecasts and fundamental points-of-view with Woodmac's independent third-party outlook.
- Unlimited access to the analysts behind the reports

Gain an understanding of the drivers of NGL supply and demand on a regional basis

Combining our proven NGL production forecast with a demand outlook, we publish a monthly supply, demand and inventory outlook for ethane, propane, and butane.

Our best-in-class outlook incorporates pipeline flow and cracker operation data collected from our patented sensor technology with public information from company statements, government agencies and industry organisations.

We also leverage our internal models of chemical feedstock values, export forecasts and weather data to enhance our outlooks.

Graphically view inventories and key balance variables vs. history to see changes through time and consider implications and opportunities for your business.

## Designed for you

### Analysts

Improve your in-house analysis by incorporating granular data into your models for ethane, propane and butane. See how infrastructure constraints, export economics and changes in the cash cost relationships for chemical feedstocks can affect NGL demand.

### Traders/Marketers

Understand how supply and demand dynamics may impact regional balances and prices. Our detailed models will supplement your views and provide a third-party outlook to see the market from a different angle.

### Business Development

See where bottlenecks occur to position your business for opportunity. Our detailed, fundamentals-based data will help you fill any gaps in your analytical work.
