

Weekly Propane Review

- Weekly PDF report delivered every Wednesday via email
- Graphs and tables outlining current weekly statistics relative to history, and market pricing relative to cracker feed preference and arbitrage economics
- Detailed commentary on EIA statistics overall, relative to Woodmac's expectations
- An estimate of next week's EIA statistics, an outlook for US propane inventories over the next season, and implications for propane and related NGL pricing

- Confirm, challenge, or augment in-house analysis with Woodmac's independent third party data and outlook
- Enhance decision-making for capital investment and trading when you understand the drivers of future propane supply and demand prices
- Gain an early look at expectations for the following week's inventories and impacts on the market
- Unlimited access to the analysts behind the reports

Woodmac's Weekly Propane Review combines the latest fundamental data with market pricing to give you the most comprehensive look at current market conditions. Published on Wednesdays after the EIA data is released, Woodmac's experienced market analysts provide a concise evaluation of the weekly statistics, review market pricing relative to cash costs and arbitrage economics and deliver an outlook for the next week's inventories.

Get the advantage of Woodmac's real-time monitoring of natural gas production, NGL pipeline flows, vessel tracking, refinery and ethylene cracker operations, and other proprietary models to improve your understanding of the weekly statistics and near-term balances. The Weekly Propane Review is especially designed to supplement the Monthly Propane Supply & Demand Report by aggregating and analysing market fundamentals in real-time and overlaying market pricing to give you the best understanding of value and immediate opportunity for your business.

Designed for you

Traders / Marketers

Enhance decision-making in the physical and financial propane markets with our detailed, short-term outlook on propane markets.
