

# Benzene, Styrene & Derivatives

**Understand the key commercial trends, supply-demand and capacity for benzene and styrene industry**

Long-term services  
with forecasts to **2050**

Bi-annual updates

Supply, Demand, Trade,  
Capacity and Projects,  
Long-Term Pricing Outlook

Consistent, granular,  
application focused  
demand taxonomy: with  
new, integrated Materials  
Applications Platform

Short-term services with up  
to **24-month** outlook

Supply, demand, price forecasts

Interactive dashboard with trade,  
price, margin and cost data

Global benzene and styrene  
production and consumption  
activity of around **100 million  
tonnes per year, involving over  
300 sites and 1,200 assets  
globally.**

## Use it to:

Examine the outlook  
on production costs  
and profitability for  
benzene, styrene  
and key feedstocks

Identify investment  
opportunities and  
manage risk in the  
commodity chemical  
markets

Understand the  
supply/demand outlook  
both globally and  
regionally, by country

Assess the impacts of  
plant outages, supply  
restrictions,  
technology changes  
and other factors

Recognise and  
understand price  
drivers

Identify inter-regional  
trade patterns and  
arbitrage opportunities
