

## Table of Contents

1	Technology overview .....	6
1.1	UOP advanced MTO .....	7
1.2	DMTO-I/DMTO-II.....	7
1.3	S-MTO.....	7
1.4	Lurgi MTP.....	7
1.5	OCU/OCP/OCC .....	8
1.6	Technology market share.....	10
1.7	Other potential technologies.....	11
2	China coal market overview .....	11
2.1	China thermal coal supply.....	11
2.2	China thermal coal demand .....	16
2.3	China coal prices.....	20
3	Methanol Overview .....	22
3.1	Methanol supply .....	22
3.2	Methanol demand .....	24
3.3	Methanol trade .....	25
3.3.1	Domestic trade .....	25
3.3.2	International trade .....	26
3.4	Methanol price.....	27
4	China olefin market overview .....	28
4.1	China ethylene market analysis .....	28
4.1.1	China ethylene supply.....	29
4.1.1.1	Steam crackers .....	29
4.1.1.2	Coal and methanol-based olefins.....	30
4.1.2	China ethylene demand .....	32
4.1.3	Ethylene and derivatives trade .....	33
4.2	China propylene market analysis .....	36
4.2.1	China propylene supply.....	36
4.2.2	China propylene demand .....	37
4.2.3	Propylene and derivatives trade.....	38
5	CTO/MTO and CTP/MTP Overview .....	40
5.1	Coal- and methanol- based olefins operations review.....	40
5.2	Derivatives integrated with CTO/CTP and MTO/MTP .....	42
5.3	CTO/MTO C4/C5s.....	43
5.4	Logistics: coal and olefin derivatives .....	44
5.5	Constraints and hurdles for new CTO/CTP projects .....	45
5.5.1	Water supply .....	46
5.5.2	Environmental issues .....	47
5.5.2.1	Carbon tax .....	47
5.5.2.2	Environmental impact assessment (EIA) .....	48
5.5.3	Project financing.....	48
5.6	CTO/MTO and CTP/MTP projects initiatives and development trend .....	48
5.6.1	Initiatives .....	48
5.6.2	Trends .....	49
5.7	Social Implication .....	49

6	China coal chemicals policies .....	49
6.1	Central government policies .....	50
6.2	Provincial government policies .....	52
6.3	Policy Summary .....	54
7	Economics overview .....	54
7.1	The sensitivity of CTO and MTO profitability at different crude oil scenarios .....	56
7.2	Cost comparison at different crude oil scenarios .....	58
7.2.1	Coal-to-Olefins (CTO) .....	59
7.2.2	Methanol-to-olefins (MTO) .....	60
7.3	How does CTO and MTO compare with naphtha-based production? .....	60
7.3.1	Base case .....	60
7.3.2	Low case .....	62
7.3.3	High case .....	63
7.4	Why do companies still invest in MTO despite weak cost position? .....	64
7.5	How does coal or methanol based propylene production compare with PDHs? .....	65
8	CTO/MTO Unit and Project Profiles .....	67
8.1	Shenhua Baotou .....	67
8.2	Shaanxi Yanchang China Coal Yulin Energy & Chemical .....	68
8.3	China Coal Shaanxi Yulin Energy and Chemical Co., Ltd .....	69
8.4	Ningxia Baofeng Energy .....	70
8.5	Pucheng Clean Energy Chemical .....	71
8.6	Zhongtian Hechuang Ordos Coal Chemical .....	72
8.7	Shenhua Xinjiang .....	73
8.8	Qinghai Salt Lake Industry Co., Ltd .....	74
8.9	Sinopec Zhongyuan Petrochemical .....	75
8.10	Ningbo Fund Energy Co., Ltd .....	76
8.11	Chengzi Nanjing Clean Energy .....	77
8.12	Zhejiang Xingxing New Energy .....	78
8.13	Shandong Shenda Chemical .....	79
8.14	Shenhua Yulin Energy Chemical Co., Ltd .....	80
8.15	Shandong Yangmei Hengtong Chemicals .....	81
8.16	Inner Mongolia China Coal Mengda .....	82
8.17	Jiangsu Sailboat Petrochemical Co., Ltd .....	83
8.18	Fund Energy Changzhou Chemical .....	84
8.19	Shenhua Ningxia – CTP Line 1&2 .....	85
8.20	Inner Mongolia Datang Duolun .....	86

## Chart List

Chart 1: A typical coal-to-olefin process flow.....	6
Chart 2: Lurgi MTP® technology .....	8
Chart 3: MTO/MTP technology market share .....	10
Chart 4: Thermal coal production by province, Mt .....	14
Chart 5: Supply capacity change, Bt .....	16
Chart 6: Thermal coal demand by sectors .....	17
Chart 7: Thermal coal demand by regions .....	18
Chart 8: GDP by sectors and thermal coal demand .....	18
Chart 9: Coal generation in power mix .....	19
Chart 10: Coal demand by coal to chemicals, Mt .....	20
Chart 11: Conversion coal demand by regions, Mt .....	20
Chart 12: Historical thermal coal prices (FOB Qinhuangdao 5500 kcal/kg NAR) .....	21
Chart 13: Thermal coal prices in QHD, Ordos, Ningxia and Xinjiang, RMB/t .....	22
Chart 14: China methanol supply and demand .....	23
Chart 15: 2010 methanol demand .....	24
Chart 16: 2016 methanol demand .....	24
Chart 17: Domestic methanol trade and operational MTO distribution .....	26
Chart 18: China methanol import and partnering countries .....	27
Chart 19: China methanol price and Qinhuangdao coal price .....	28
Chart 20: China ethylene supply-demand overview .....	29
Chart 21: China ethylene production by feedstock .....	29
Chart 22: China CTO and MTO additions .....	31
Chart 23: CTO/MTO's share of China ethylene capacity .....	32
Chart 24: CTO/MTO and steam cracker five-year development trend .....	32
Chart 25: China ethylene demand into derivatives .....	33
Chart 26: China ethylene net imports .....	34
Chart 27: China net imports of ethylene derivatives .....	34
Chart 28: CTO/MTO-based PE and imports .....	35
Chart 29: Polyethylene addition from steam cracker and CTO/MTO .....	35
Chart 30: China propylene overview .....	36
Chart 31: China on-purpose propylene production .....	37
Chart 32: China propylene demand overview .....	38
Chart 33: China propylene trade .....	38
Chart 34: China derivatives net trade in propylene equivalent .....	39
Chart 35: on-purpose propylene based PP and import .....	39
Chart 36: Inner Mongolia China Mengda, taken by Kelly Cui on 17 July 2017 .....	40
Chart 37: Coal- and methanol-based olefins operation in 2010-2016 .....	41
Chart 38: MTO ethylene derivatives      Chart 39: MTO propylene derivatives .....	43
Chart 40: CO2 emission from different coal conversion process .....	47
Chart 41: Cash cost comparison (2016) .....	55
Chart 42: Historical cost and margin .....	55
Chart 43: Brent vs Northwest Coal .....	56
Chart 44: 2022 Global Ethylene production cost curve (\$/t) – base crude case .....	57
Chart 45: 2022 Global Ethylene production cost curve (\$/t) – high crude case .....	57
Chart 46: 2022 Global Ethylene production cost curve (\$/t) – low crude case .....	58
Chart 47: Brent oil prices in 2005-2025 .....	59
Chart 48: CTO cast costs (per tonne olefins) .....	59
Chart 49: MTO cash costs (per tonne olefins) .....	60
Chart 50: Ethylene costs – base case .....	61
Chart 51: Ethylene margins – base case (\$/t) .....	61
Chart 52: HDPE margins – base case (\$/t) .....	61
Chart 53: Ethylene costs – low case .....	62
Chart 54: Ethylene margins – low case (\$/t) .....	62
Chart 55: HDPE margins – low case (\$/t) .....	62
Chart 56: Ethylene costs – high case .....	63
Chart 57: Ethylene margins – high case (\$/t) .....	63
Chart 58: HDPE margins – high case (\$/t) .....	63
Chart 59: MTO ethylene derivatives .....	64
Chart 60: MTO propylene derivatives .....	64
Chart 61: MTO margins .....	65
Chart 62: 2016 cash cost .....	66
Chart 63: Propylene margins from different production routes: Propylene margins .....	66
Chart 64: Propylene ROI% from different production routes .....	66
Chart 65: 2017 Olefins cost of production for CTO MTO Shenhua Baotou assets .....	67
Chart 66: 2017 Olefins cost for productions for CTO MTO Shaanxi Yanchang assets .....	68
Chart 67: 2017 Olefins cost of production for CTO MTO China coal assets .....	69

Chart 68: 2017 Olefins cost of production for CTO MTO Ningxia Baofeng assets .....	70
Chart 69: 2017 Olefins cost of production for CTO MTO Pucheng clean energy assets.....	71
Chart 70: 2017 Olefins cost of production for CTO MTO Zhongtian Hechuang assets .....	72
Chart 71: 2017 Olefins cost of production for CTO MTO Shenhua Xinjiang assets .....	73
Chart 72: 2017 Olefins cost of production for CTO MTO Qinghai Salt Lake assets .....	74
Chart 73: 2017 Olefins cost of production for CTO MTO Sinopec assets .....	75
Chart 74: 2017 Olefins cost of production for CTO MTO fund energy assets .....	76
Chart 75: 2017 Olefins cost of production for CTO MTO Wison Nanjing assets .....	77
Chart 76: 2017 Olefins cost of production for CTO MTO Zhejiang Xingxing assets .....	78
Chart 77: 2017 Olefins cost of production for CTO MTO Shandong Shenda assets.....	79
Chart 78: 2017 Olefins cost of production for CTO MTO Shenhua assets .....	80
Chart 79: 2017 Olefins cost of production for CTO MTO Shandong Yangmei assets .....	81
Chart 80: 2017 Olefins cost production for CTO MTO China Coal Mengda assets.....	82
Chart 81: 2017 Olefins cost of production for CTO MTO Jiangsu Sailboat assets .....	83
Chart 82: 2017 Olefins cost of production for CTO MTO fund assets .....	84

## Table List

Table 1: Reaction Mechanism .....	6
Table 2: MTO technology comparison .....	9
Table 3: Technology share.....	10
Table 4: China coal reserves by provinces as of 2016.....	12
Table 5: Some coal-to-chemical plants and their coal feedstock supply .....	16
Table 6: CTO/CTP associated methanol capacity.....	23
Table 7: Methanol quality required for MTO .....	24
Table 8: Non-integrated MTO plants methanol source.....	25
Table 9: China steam cracker projects (Firm/Likely) .....	30
Table 10: China CTO projects (Firm/Likely) .....	31
Table 11: China MTO projects (Firm/Likely).....	31
Table 12: Summary of Coal- and methanol- based olefin capacity through mid-2017 .....	41
Table 13: China operational CTO/CTP derivatives .....	42
Table 14: Existing CTO/MTO C4/C5s processing .....	44
Table 15: Main Indicators of Resource Utilization Efficiency.....	51
Table 16: Ningxia 13th five-year plan modern coal chemical key planned projects .....	53
Table 17: Ningxia petroleum and chemical industry specifications for projects requiring approval and forbidden projects.....	53
Table 18: Total investment costs (\$2016) from different production routes in China.....	54
Table 19: Cash cost breakdown (2016).....	55

## Map List

Map 1: China coal fields distribution.....	13
Map 2: Coal production layout envisaged by the Coal Industry 13th Five-Year Plan .....	15
